

**ON VARIATIONAL FORMULATIONS FOR THE TRANSITION
FROM ELASTO-DAMAGING TO ON**

displacement jumps [] (cracks) and it is related to the fracture energy γ . While in [5] a "global" approach is used, here the problem (1) is formulated in an incremental format,

One-dimensional finite element models based on the modified nonlocal functional (3) have been developed. As shown in Figure 2b, the presented nonlocal formulation for elastic

$\frac{1}{2}$
